

speed. convenience. rewards

 **Solidus**

speed. convenience. rewards.

VSolidus® is the result of our growing communities joint efforts to develop a new, better and faster transactional coin that can serve as a good alternative to the current, industry standard Bitcoin.

Solidus® was originally a gold coin issued within the Late Roman Empire and VSolidus® stems from 'Via Solidus' an anagram of the coin creators name.

VSOL is the chosen abbreviation for the coin which SOL represents a day on Mars and also lends itself to the coins algorithm of coin issuance which is set to half every 2 years when Earth aligns with Mars.

Solidus® background.

VSolidus® is a new peer-to-peer internet currency that allows instant, nearly free payments to anyone, anywhere in the world. VSolidus® is a global payment network that is fully decentralised and has no central authorities. No one can counterfeit transactions, initiate chargebacks, or seize funds... not even a government. While this makes it harder to retrieve lost money, it also makes it harder to lose your money. With enough care, this coin is a far more practical alternative to FIAT (paper) money.

The mathematical algorithm secures the network and empowers individuals to control their own finances. VSolidus® offers faster transaction confirmation times and better storage efficiency than other leading math-based currencies.

The secure VCode® technology has been integrated to allow fast and secure mobile to device payments. Further integration will empower the wallet holder to limit transactions to specific locations, date, device type or network the device is operating on.

This enhances security of VSolidus® transactions, boosts user trust towards the payment ecosystem and lends itself to consumer facing trend and promotion by daily use.

Solidus[®] background.

THE BLOCKCHAIN

The VSolidus[®] blockchain is capable of handling a much higher volume of transactions than its Bitcoin counterpart. Due to more frequent block generation (every 30 seconds), the network supports more transactions without having to change the software in the future.

As a result, merchants see a pending transaction within a few seconds and get full confirmation within the block time. VSolidus[®] users still have the option to wait for more confirmations when selling larger items which can be set within VSolidus[®] Core.

Bitcoin fails massively in practicality, while high transaction fees limit trading to large goods and long transaction times take the wind out of Bitcoin's sails, VSolidus[®] steps in and solves these problems.

It would be nonsensical to have to wait an hour to buy a coffee or pay a higher fee than the coffee is worth.... therefore, it would also be illogical to buy coffee with Bitcoin.

With VSolidus[®], on the other hand, with a split-second transfer across the world, that would be no problem at all.

WALLET ENCRYPTION

Wallet encryption allows you to secure your wallet so that you can view transactions and your balance, but you must enter your password before spending VSolidus[®]. This provides protection against viruses and Trojans that steal the wallet, as well as a security check before sending payments.

VSOLIDUS[®] PROOF OF WORK

VSolidus[®] uses Tenebrix's Scrypt Proof of Work. With Scrypt, you can mine VSolidus[®] and other coins like Bitcoin at the same time. These and many other technical details are similar because VSolidus[®] has evolved from Litecoin, which has a similar vision.

Solidus[®] Solidus[®] mining. pool.

AVAILABLE ON:

There are 2,800 blocks issued per day and miners are currently rewarded with 150 new VSolidus[®] coins per block, an amount that decreases over time.

Considering our faster blocks, in order to properly mimic Bitcoin's generation process, we had to change the blocks where coin generation is halved.

Bitcoin generation is halved every 210,000 blocks. VSolidus[®] generation is halved every 2,102,400 blocks. For those of you doing the math, VSolidus[®] is scheduled to produce about 4,500 times as many coins as Bitcoin, about 92 billion VSolidus[®].

It takes around two years for VSolidus[®] to reset its algorithm, this is roughly each time Earth aligns with the Planet Mars.

TRANSACTIONS

Fast confirmations are usually not as secure as Bitcoin's slower confirmations due to the ability to mine a side chain and initiate a 51% attack to allow a double spend to happen. Since the VSolidus[®] hard fork v.4, all mining is through the VSolidus[®] pool which prevents this. In addition to this, VCode[®] will enhance the fast ledger with secure verifiable credentials.

The average duration of a VSolidus[®] block is much faster than Bitcoin, allowing for better usage in normal daily transactions.

Merchants may choose to wait longer for a larger number of VSolidus[®] confirmations like they do with Bitcoin. But most merchants can easily accept 1-confirmed transaction for small VSolidus[®] amounts with VCode[®] assistance.

VSOLIDUS[®] DIFFICULTY

VSolidus[®] uses a much faster retarget time, as previous versions were ridiculously slow. The combination of fast retarget times and Script proof of work means that we don't expect to see the kind of problem that Namecoin encountered; hashing power that leaves more suddenly than it arrived, creating a high difficulty slog for anyone who stayed.

VSOLIDUS[®] SATURATION

As with real mining, the more miners taking part means the rewards received across the community become saturated.

This increased difficulty met with supply and demand to receive the Solidus coins for FREE will eventually be the cause to make them appreciate in value.

Solidus[®] roadmap.

The development thus far has been carried out by the Nova Wallet[®] team with help from the fast growing VSolidus[®] community.

The founding members of VSolidus[®] specialise in Security, KYC and Payment Technologies as well as brand creation and marketing.

Q2 2021

Launches:

- [VSolidus.com](https://vsolidus.com) website
- VSolidus[®] Core Windows
- Git Repository
- VSolidus[®] Node directory
- VSolidus[®] Core MacOS
- VSolidus[®] Block Explorer

Achievements:

- Community mining started

Q3 2021

Launches:

- VSolidus[®] Hard Fork V3.
- VSolidus[®] Merch Store
- VSolidus[®] Rewards
- VSolidus[®] Lottery Launched
- VSolidus[®] Spinning Wheel Launched

Achievements:

- 50 Million Coins Mined by the Community.
- 1 Billion + coins distributed
- First Exchange Contract Agreed

Q4 2021

Launches:

- Nova Wallet iOS & Android
- Nova Wallet Web

Achievements:

- 150,000 Verified Users
- Multiple Exchange Contracts Signed

Q1 2022

Launches:

- Wrapped VSolidus[®] (ETH & BNB)
- Nova Exchange (Swap Portal)
- Nova Exchange (Stake Pool)
- Nova Payments (Payment Gateways)
- VSolidus[®] Academy
- VSolidus[®] Events

Achievements:

- Listed on 5 Exchanges (Bitmart, Hotbit, Bibox, XT.com, LA Token).
- Transactional currency established with Multi-Billions of VSol changing hands on a monthly basis

Q2 2022

Launches:

- VSolidus[®] Hard Fork v.4
- VSolidus[®] Mining Pool
- Nova NFT Marketplace

Solidus[®] roadmap.

Over the next 12 months, a major emphasis will be on partnerships and utility of the coin through the Nova Applications.

The project will aim to list on exchanges each quarter to draw a new influx of users.

Q3 2022

Aims:

- Nova Bank Launch
- Nova NFT Collections Launched
- Sports Sponsorship Agreed
- New Exchange Listing
- Web Summit Expo

Q4 2022

Aims:

- New Exchange Listing
- New Nova NFT & Asset Collections Launched
- First Nova Bank Cards Shipped
- Money 2020 Expo

Q1 2023

Aims:

- New Exchange Listing
- CC Forum 2023
- New Nova NFT & Asset Collections Launched

Q2 2023

Aims:

- New Exchange Listing
- New Nova NFT & Asset Collections Launched

Q3 2023

Aims:

- New Exchange Listing
- New Nova NFT & Asset Collections Launched

Solidus[®] team.

The VSolidus[®] technology team is made of professionals that specialise in banking, cybersecurity, blockchains, crypto currencies, A.I and data science.

The VSolidus[®] extended team is made up of professionals who specialise in marketing, brand sponsorship & platform trading.

The VSolidus[®] community have maintained Blockchain consensus via full-time hosted nodes that can be viewed on www.solidusnode.com a full list of block explorers can be found on www.vsolidus.com

NOVA applications.

Nova Wallet® was set up with original aim to allow the VSolidus® community to access their crypto-assets easily, securely and on the move.

Having the Nova Applications opens up a variety of use cases for the VSolidus® community to take advantage of such as mining from the core program to their device, retail scenarios, loyalty programs NFT Marketplace and realtime payments.

EASE OF ACCESS

Nova Wallet® is available on all iOS and Android devices.

For users who can't download due to not having a compatible device, there is a browser based Web Wallet allowing accessibility to all.

All download links are available on www.novawallet.co.uk

NOVA web wallet.

NOVA applications.

SECURE LOGIN

Using the Nova Wallet®, the VSolidus® community can access their coins on the move.

Nova Wallet® is protected by an 18 character passphrase, password and either a 4 digit pin code, pattern or biometric input.

TRANSACTIONS

Nova Wallet® allows high speed, secure VSolidus® transactions device-to-device within the Nova Wallet®, VSolidus® Core and exchange networks.

All sent and received transactions are displayed within the app alongside the link to the block explorer logs.

MULTIPLE CURRENCY

Nova Wallet® allows the VSolidus® community to safely receive, send and store VSolidus® coins, Wrapped VSolidus® (ETH & BNB), Bitcoin, Ethereum, Binance Coin, Doge Coin, USD Tether, Binance USD

The crypto value can be displayed in any global FIAT currency and is linked to realtime exchange values (taken from Coin Gecko).

NOVA applications.

INTEGRATING VCODE FOR SECURITY

Using the revolutionary VCode® technology, the existing community of VSolidus® can send and receive their desired crypto in an end-to-end secure way. VCode®

EXTENDED USE OF NOVA WALLET®

VSolidus® Community users will also be able to take advantage of their Nova Wallet® by assigning other 'things' to their VCode®.

These things can be accessed based on the scanners geo-location, login, time, date, device type and more.

MULTIPLE CURRENCY

Nova Wallet® allows the VSolidus® community to safely receive, send and store VSolidus® coins, Wrapped VSolidus® (ETH & BNB), Bitcoin, Ethereum, Binance Coin, Doge Coin, USD Tether, Binance USD

The crypto value can be displayed in any global FIAT currency and is linked to realtime exchange values (taken from Coin Gecko).

Consumer Reviews

- Marn** ★★★★★ 29 October 2021
Really good step in the right direction for this coin. Looking forward to what the future brings. Low transaction fees with real life potential. App allows sending and receiving easily for VSOL and BTC too which is great!
- victor cheruiyot** ★★★★★ 28 October 2021
Very intuitive. I can easily send and receive VSOL and BTC from my wallet. The one time pass phrase makes it easy to retrieve your wallet incase you lose your device.
- progamertom 78** ★★★★★ 29 October 2021
This makes it very easy to manage you coins. Not just at home but anywhere, it's a very good idea and this is only the beginning. I'm excited to see the future.
- Mike Mulroy** ★★★★★ 28 October 2021
Super simple wallet and a really great addition to the platform Never even thought of crypto before with all the bad press, high energy bills and costly machine so to mine on my laptop whilst working is a doddle
- Lord Scott** ★★★★★ 29 October 2021
Super user friendly with intuitive UI/UX. Perfect for your vsol and btc transactions. Highly recommended.
- Matt w** ★★★★★ 31 October 2021
Awesome crypto wallet, really easy to use and has huge potential for the future !!
- Colin Nolan** ★★★★★ 29 October 2021
Really easy to use! Works great with Solidus. Highly recommended.
- Dean Siddall** ★★★★★ 28 October 2021
Great work from a top team, hopefully setting a new standard.
- A Google user** ★★★★★ 29 October 2021
Extremely easy to use and convenient wallet, ideal if you are currently mining VSOL
- Ryan Dunleavy** ★★★★★ 29 October 2021
Safe,fast and user friendly
- Ned Husein** ★★★★★ 28 October 2021
Great app, Easy to use.
- Ex_Supra 9** ★★★★★ 1 November 2021
Easy to use and navigate app. Access your VSol anywhere anytime.
- Glyn Richards** ★★★★★ 31 October 2021
Versatile and easy to use wallet 👍.
- Charan Thorat** ★★★★★ 28 October 2021
excellent

Consumer Reviews

Maureenoh, 28/10/2021

Great app exciting times ahead

Delighted to finally see the app going live. Very easy to set up and transfer. I love it's not complicated. Well done everyone

GordyLiv, 28/10/2021

Great App, Easy to Use

Really good app to save and store your coins, easy to download and use, and very secure. Totally recommend.

Essexuk, 28/10/2021

First Class

At last a secure wallet easy to send and receive crypto on the phone

Trigger01223456, 28/10/2021

Works very well

Downloaded this wallet today. Works perfect , no problems at all 👍

quins921, 28/10/2021

Nova wallet

Easy to use and great design
Would highly recommend storing your crypto currency in this wallet.

SWNovaReview, 28/10/2021

Five star app

Great way to store my VSol coins safely and can't wait to start using it for transferring safely as well

speed.
convenience.
rewards.

VCode® is the next generation of 2D barcodes. Within this presentation are just some of the sectors where VCode® will enhance both the user, brand and customer experience.

VCode® is a secure scanning framework and is not susceptible to **hacking**, unlike traditional barcodes.

VCode® scanning technology allows the code to be scanned up to 10 seconds faster and at a greater distance than any other barcode... Perfect for crowd management or payments on the move.

2.2 Quintillion, guaranteed collision-free codes available (De-centralised codes can exist more than once).

A single VCode® can be used to display different information to different users based on permissions*.

WHITEPAPER #110521

Competitions & Charity Donations

VCode® allows users to enter competitions and donate to participating charities with a single scan from any media.

Interactive Gaming

The VCode® can be used for the interconnectivity and purchase of any form of gaming from app purchases, physical games and even 'bet-in-play'.

Tickets

The VCode® can purchase any form of ticket. It can also be used as a secure, physical or digital ticket in it's own right.

speed. convenience.
rewards

Solidus[®] points.

The VSolidus[®] Points feature rewards consumers/users through their participation via 'Daily Missions'.

Once a Nova Wallet[®] user pairs their wallet with a VCode[®] account they will earn VSolidus[®] Points by interacting with their surroundings and scanning VCodes.

VCode[®] interactions can be Nova Wallet-to-Nova Wallet transactions, interacting with billboards, products, exchanges and more.

VSolidus[®] will introduce further gamification into the daily missions each time they on board partners into the VSolidus[®] & Nova Wallet ecosystem rewarding user with VSolidus[®] Coins, Nova NFTs, retailer rewards and more.

speed. convenience. rewards

NOVA NFT.

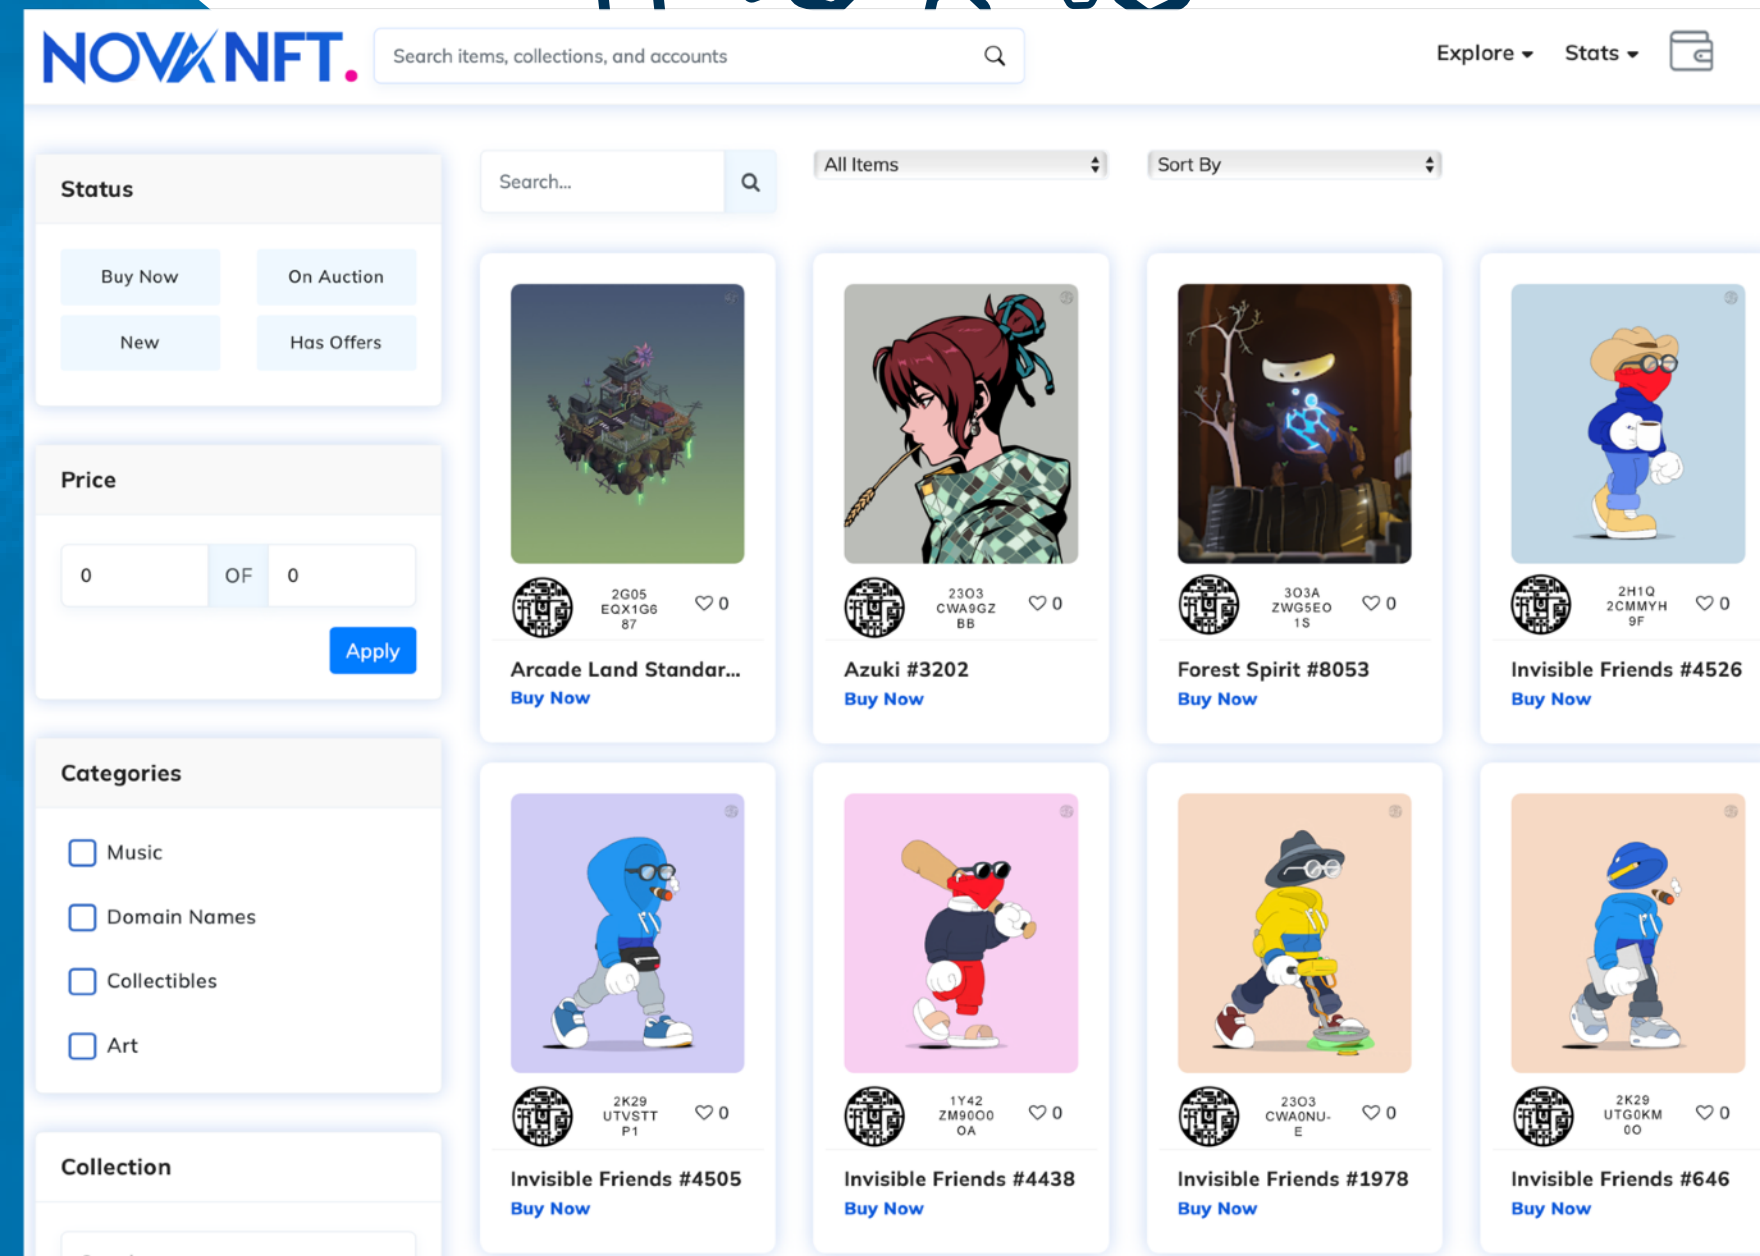

In a world first, Nova NFTs' are protected by the ultra secure VCode® technology which can show proof of provenance and validation of the NFT as-well as display extra content from the current owner or the NFT creator.

The NFT owner, 'owns' the VCode® associated and can display different content based on the geo-location someone interacts with the NFT, the time, date, type of device and how many times they have interacted with the NFT.

The plan is to raise the value of VSolidus® enough to purchase property, minerals and other assets over and above digital art through the NFT Marketplace.

All payments for Nova NFT's will be through wrapped VSolidus®.

This level of interaction also offers the VSolidus® community a method of circulating rewards in competitions by interacting with VSolidus® NFTs' in crypto treasure hunts.

Nova Bank integration with Nova Wallet App will commence in Q3 of 2022 with live deployment to be announced.

The Nova Bank platform will allow users to apply for a full international bank account along with a pre-paid Mastercard.

Users will be able to spend directly from their Cryptocurrency holdings rather than cashing out to top up their card.

Solidus[®] team.

VSOLIDUS[®] AVATARS

In a bid to promote the success of VSolidus[®], we have created the avatar VSolidus[®] and community reach campaigns around: #whoisVsolidus #iamVsolidus #weareVsolidus & #teamVsolidus

As the community grows, more and more avatars of individuals or celebrities will appear to be VSolidus[®] as a means to keep people engaged and spreading the word of VSolidus[®].

Solidus[®] store.

Through the print-on-demand Shopify store on the VSolidus[®] website, our community can purchase anything from promotional stickers, laptop bags to hoodies.

We want #teamVsolidus to be proud to represent something they helped create.

Branded merch will also be used for competition prizes to help boost the community.

Solidus[®] partners.

VSolidus[®] are always looking for strategic partnership. We would like to thank our existing partners that have helped assist the development and management of the Solidus Project.
